

Stay connected,
talk instantly in
real time with
video phone calls.

**Family
Connect**

SAMSUNG

What is Family Connect?

- A non-proprietary state of the art high definition television, camera and software package that allows friends and family to seamlessly make video phone calls in a live setting at anytime.
- Silver, gold and platinum packages are available for community rooms, individual rooms and distant families.
- High definition 3D entertainment can be experienced with the addition of a Blu-ray DVD player, 3D glasses, gaming consoles, wireless surround sound and more.

Benefits

- Enrich your residents lives by giving them a revolutionary way to communicate and in turn battle the geographical divide and busy day to day lifestyles.
- Be proactive and on the cutting edge of innovation by offering a technology product suite that your competitors are not.
- Communicate better, faster and cheaper to stay ahead of the game.

Benefits

- Photos are static
 - Phone calls are voice only
 - Videos are not in real time
-
- A video call using Family Connect is combining all of these technologies into one and is the next best thing to being in the same room together.

The Technology Age

- Do you offer your residents technology such as HDTV, a computer with Internet access, gaming consoles such as Wii and Xbox Kinect or other electronic and communication technologies?
- Are these technologies up to date and readily available for your residents to use?
- How often are you asked by prospective families if you offer these technologies?

The Technology Age

- Family's of baby boomers grew up in the computer age and expect an instant and hi tech connection in all they do.
- Providing them with a life like connection to their friends and family will be the norm in years to come.
- Are you prepared for the tech savvy and baby boomer generation to be your next residents?
- Do you have a technology company that is capable of maintaining and successfully implementing quality Technology, Electronics and Communication solutions for your business?

Mfactor TEC

- Mfactor has been specializing in Technology, Electronics and Communication since it's founding in 1998.
- The Mfactor team is comprised of experienced, educated and certified professionals some of which are regular guests on radio and television to talk about technology, serve on the boards of technology companies and non-profit organizations, are adjunct professors, published authors, and patented inventors.
- Combining multiple technologies to produce the results you need to succeed in today's competitive world is what Mfactor does best.

Thank You!
